homely

Smart. Simple. Homely.

Simplify heat pump installations and beyond, with Homely

What is Homely?

Homely is the smart controller designed specifically for heat pumps. Making your life easier on install day and long after. It's intuitive, easy to install and compatible with most heat pumps.

Homely just got even better!

Each controller now comes with two years' Connect Pro included, giving you remote access and control to save time and money.

How it works

Designed with you in mind, Homely takes the hassle out of heat pump installations:

Inclusive insights: Remote monitoring, diagnostics and controls reduce the need for callbacks and keep your customers smiling.

Simple set-up: automatic weather compensation curves ensure greater efficiency and smarter installations.

ECO4

An approved ECO4 Innovation Measure, Homely increases the controller Partial Project Score by 25% and makes your installs even smarter.
