Smart Monitoring with Homely Connect

JUST LAUNCHED

A service portal designed to improve Heat Pump visibility

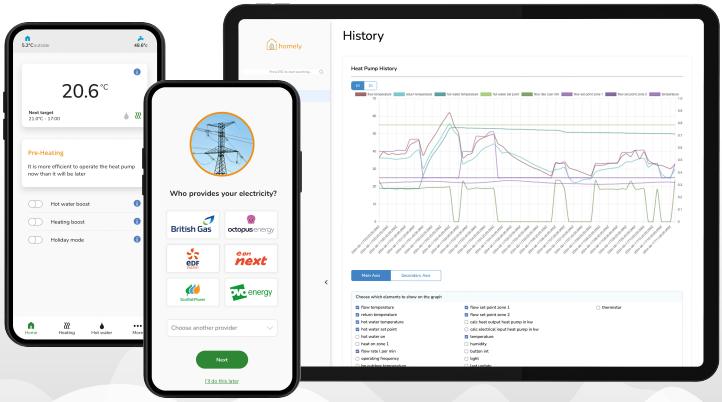

Reduce call-outs and delight customers

Early fault detection
Pre-empt customer calls with automatic alerts for potential heat pump issues.

Problem-solving
Proactively diagnose problems using accurate historical and live data.

Remote parameter changes
Make settings adjustments remotely before they escalate, reducing the number of call-outs.

Brand agnostic
Visibility of all your heat pump installs in one portal, regardless of brand.
